

# call for poster

deadline april 29 2024

day of engineering sciences  
at schmalkalden university  
of applied sciences  
june 12 2024

## rising

thuringia's regional innovation strategy and  
the potential of Engineering Sciences  
in its implementation

The RIS strategy is a higher education political initiative of the state of Thuringia, aiming to strengthen innovative research and development. These efforts significantly contribute to addressing future challenges spanning societal, ecological, and demographic issues. The strategy seeks not only to promote but also to unite and connect various approaches within a comprehensive program.

Engineering Sciences are a key driver of these innovations and link even universities, non-university research institutions and business stakeholders. From architecture to electrical engineering, from computer science to horticulture, from healthtech to mechanical engineering: engineering sciences provide impulses in all areas, developing solutions to pressing present and future questions.

On the Day of Engineering Sciences, which will take place on June 12, 2024 at the Schmalkalden University of Applied Sciences, young researchers have the opportunity to showcase their projects to the public through a poster presentation. In addition to the exhibition in the foyer featuring the submitted posters, the most outstanding submissions have the chance to present their projects in a pitch. All young researchers are invited to apply.

## Application deadline

**29. April 2024**

## Details

**Name, Institution, Abstract**

## Self-assignment in the central issues of the RIS strategy

- Industrial production and systems
- Sustainable and intelligent mobility and logistics
- Healthy living and health economy
- Sustainable energy and use of resources, Information and communication technologies, innovative and production-related services

## Information

**you will always find the latest information at**
