Course Description – Winter Semester 2025/2026

Title	Project Management (Code: PrjMan Ba)
Faculty	Computer Science
Professor	Prof. Dr. Kurt Englmeier
ECTS	5
Level	Bachelor
Requirements	-
Add. Information	-
Content	This digital course provides a comprehensive introduction to the principles and benefits of project management, following the PMI's PMBOK framework. It covers ten key knowledge areas, including scope, cost, risk, and stakeholder management, and explores the role of project managers in driving successful change. Students learn to apply planning and control tools and understand how project phases are structured in practice. Interactive quizzes help to assess learning progress.
