

Course Description – Winter Semester 2022/23

Title	Intercultural Learning and Event Management - International Engineering Week
Faculty	Mechanical Engineering
Professor	Prof. Dr.–Ing. habil. E. Kolev
ECTS	2.5
Level	Bachelor students, Master students (Master Students will not receive 2.5 ECTS)
Requirements	English, basic knowledge in mechanical engineering
Add. Information	<ul style="list-style-type: none"> - Total of 10 lectures (90 min. each) from international professors, group work, excursions, workshops and team building activities. - Examination : written exam on the lecture contents ca. 60min. - Dates : Winter semester 2022/2023 (05. Dec. 2022 – 09. Dec. 2022) - Accompanying documents : Script with summaries of the lectures
Content	<ul style="list-style-type: none"> - The main component of the module is the international lecture and event week, in which, in addition to students from the Mechanical Engineering program, mainly foreign guest students participate, - The students are actively involved in the preparation, implementation and follow-up of the event week. They take over the organization of groups, each consisting of several foreign guest students, - The contents of the lectures offered during the week are assigned to different engineering topics and are offered in English. The contents of the lectures will be announced in time. The lecturers are professors from partner universities and from the own faculty, - The excursions include visits to manufacturing companies in the fields of mechanical engineering, plant engineering and vehicle construction, but also to cultural institutions in the vicinity. <p>Goals :</p> <ul style="list-style-type: none"> - Being part of foreign-language engineering courses, - Taking examinations in foreign languages, - Building and deepening social and intercultural skills, - Development of organizational and communicative skills
