Dear students,

welcome to Schmalkalden University of Applied Sciences, even if you are not there!

Our summer term starts today. Due to the corona crisis, it is a very unusual start. Unfortunately, we cannot meet you in Schmalkalden right now. Nevertheless, all courses will be offered as announced. In general, we plan to start with all classes in May. However, the outlines and parts of the course material are already available at “studip”. In addition, some professors will start to assign presentations to the students or share some information online.

Thus, it is important for you to join our studip platform as soon as possible, in order to get detailed information for each course.

Best regards and stay healthy

Prof. Dr. Robert Richert
