

Course Description – Summer 2022

Title	IT-Security (advanced chapters)/IT-SecAdv
Faculty	Computer Science
Professor	Prof. Ralf Staudemeyer, PhD
ECTS	5
Level	Master
Requirements	IT-Security, Operating Systems, Computer Networks
Add. Information	
Content	This course teaches students to improve their ability to understand and master current developments in IT-Security and Privacy-Enhancing Technologies (PET). Students improve their academic writing skills and research techniques that they will apply on pre-selected research topics. Aside from a comprehensive literature research, students will develop a scientific contribution. Results will be presented in form of a conference paper. This includes a research proposal, conference presentation and an academic publication.
