SCHMALKALDEN UNIVERSITY OF APPLIED SCIENCES

The Schmalkalden University of Applied Sciences is situated in an idyllic setting at the edge of the Thuringian Forest in the State of Thuringia. All facilities such as lecture halls, laboratories, the food court, the library, dormitories and sports venues are merely a stone's throw away from each other. The Schmalkalden University of Applied Sciences provides a broad range of studies within its five faculties: Electrical Engineering, Mechanical Engineering, Computer Science, Business & Economics and Business Law. Students most commonly name the high practical relevance as well as the proper equipment of the university as the main reasons for choosing Schmalkalden as place of study. Forms of training such as project-based learning and practice phases are just as natural to them as small study groups and close contact towards the professors.

INTERNATIONAL OFFICE

The International Office coordinates the international relations of the Schmalkalden University of Applied Sciences and maintains contact to its partner universities and other institutions participating in student and lecturer exchange programmes. It provides organisational information on and support for study-related stays abroad. Furthermore, it is responsible for the admission of foreign study applicants as well as for mentoring foreign students and guests of the Schmalkalden University of Applied Sciences.

The Schmalkalden University of Applied Sciences is committed to the "National Code of Conduct on Foreign Students at German Universities" and to the "Code for German University Projects Abroad" by the German Rectors' Conference (HRK).

The Schmalkalden University of Applied Sciences commits itself to the "Diversity Charter" for promoting diversity in businesses and institutions.

The Schmalkalden University of Applied Sciences is a member of the international university marketing consortium GATE Germany.
